# STEP 5.2 – ENTER DIAGNOSE MODE AND START RECORD

- 1. Click "Start record"
- The failure where the red color is showed on the screen will be recorded by system automatically.
- The failure or unexpected riding by the rider could be recorded manually by pressing button "Mark".

#### CAUTION/ATTENTION

• Don't keep the phone away from the device.

## STEP 5.3 – ENTER DIAGNOSE MODE AND START RECORD

Explanation for RPM light

In normal forward pedal: RPM showed CW
 In normal backward pedal: RPM showed CCW (with red outline).

When rider's pedaling direction is different with RPM indicator, please press "Mark".

## STEP 5.4 – ENTER DIAGNOSE MODE AND START RECORD

- 1. Press "Stop" to terminate the record.
- 2. Send mail to MPF, or press "OK" to close the alert window.

### STEP 5.5 – ENTER DIAGNOSE MODE AND START RECORD

1. Press "Exit" to quit MPF APP.

### STEP 6 – EXPLANATION FOR RED LIGHT SIGNAL

Indicator	Red light	Note
Display	No CAN BUS	
Motor	No CAN BUS	
Battery	No CAN BUS	Please ensure if the battery is with CAN BUS system if not using MPF battery.
Torque	N/A	Abnormal (MPF6.0) : <3.3V or < initial torque-0.2V (Initial torque under Diagnose/Motor setting)
RPM	Distinguish the abnormal by rider. Ex: It is regarded as abnormal if by CC when pedaling forward.	Normal forward pedal: CW Normal backward pedal: CCW with red outline.
Speed	Speed indicator with red outline when pressing the brake.	Speed value always shows 0 during riding, when speed sensor or magnet in wrong position.
Battery Voltage	N/A	Multiple reasons
Battery Current	N/A	Multiple reasons
